

No.	Course Information																																																																																																																															
1.	Course Code: UECS2053/UECS2153 Name of Course: Artificial Intelligence																																																																																																																															
2.	Synopsis: This course introduces basic artificial intelligence concepts, including supervised and unsupervised learning, problem-solving concepts, neural networks, and data science.																																																																																																																															
3.	Name(s) of academic staff: Dr. Ng Oon-Ee (PhD, BEng(Hons) Mechatronics Engineering)																																																																																																																															
4.	Trimester / Year offered: T1Y2, T2Y2, T1Y3, T2Y3, T3Y																																																																																																																															
5.	Credit Value: 3																																																																																																																															
6.	Pre-requisite / co-requisite (if any): UECS1004/UECS1104 Programming and Problem Solving																																																																																																																															
7.	Course Classification: Elective																																																																																																																															
8.	Course Learning Outcomes (CO): <div><div>Domain & Taxonomy Level¹</div><div>CO1 - Explain the fundamental concepts of AI systems. C2</div><div>CO2 - Analyse complex search problems with appropriate techniques. C4</div><div>CO3 - Design AI systems for various selection, recognition and decision-making problems. C6</div><div>CO4 - Demonstrate practical AI systems. P3</div><div>1Domain and Taxonomy Level – Cognitive (C), Level 1 - 6; Affective (A), Level 1 - 5; Psychomotor (P), Level 1 - 5</div></div>																																																																																																																															
9.	Mapping of the Course Learning Outcomes to the Programme Outcomes, Teaching Methods and Assessment: <table><tr><th rowspan="3">CO</th><th colspan="12">Programme Outcomes (PO)</th><th rowspan="3">Teaching Methods²</th><th rowspan="3">Assessment³</th></tr><tr><th>P</th><th>P</th><th>P</th><th>P</th><th>P</th><th>P</th><th>P</th><th>P</th><th></th><th></th><th></th><th></th></tr><tr><th>O</th><th>O</th><th>O</th><th>O</th><th>O</th><th>O</th><th>O</th><th>O</th><th></th><th></th><th></th><th></th></tr><tr><th></th><th>1</th><th>2</th><th>3</th><th>4</th><th>5</th><th>6</th><th>7</th><th>8</th><th></th><th></th><th></th><th></th><th></th><th></th></tr><tr><td>CO1</td><td>1</td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td>L</td><td>TE / Q / A / FE</td></tr><tr><td>CO2</td><td></td><td></td><td></td><td></td><td></td><td>1</td><td></td><td></td><td></td><td></td><td></td><td></td><td>L / P</td><td>TE / Q / A / FE</td></tr><tr><td>CO3</td><td></td><td></td><td></td><td></td><td></td><td>1</td><td></td><td></td><td></td><td></td><td></td><td></td><td>L / P</td><td>TE / Q / A / FE</td></tr><tr><td>CO4</td><td></td><td>1</td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td>L / P</td><td>A / P</td></tr></table> <div><div>*Other Teaching Methods: NIL</div><div>*Other Assessment Methods: NIL</div><div>2 L = Lecture, T = Tutorial, P = Practical, O = Others</div><div>3 Te = Test, Q = Quiz, A = Assignment, P = Practical, Pre = Presentation, CaS = Case Study, FE = Final Exam, O = Others</div></div>														CO	Programme Outcomes (PO)												Teaching Methods ²	Assessment ³	P	P	P	P	P	P	P	P					O	O	O	O	O	O	O	O						1	2	3	4	5	6	7	8							CO1	1												L	TE / Q / A / FE	CO2						1							L / P	TE / Q / A / FE	CO3						1							L / P	TE / Q / A / FE	CO4		1											L / P	A / P

CO3						1							L / P	TE / Q / A / FE																																																																																																																		
CO4		1											L / P	A / P																																																																																																																		
10.	Transferable Skills (if applicable): (Skills learned in the course of study which can be useful and utilized in other settings)																																																																																																																															
11.	Distribution of Student Learning Time (SLT):																																																																																																																															

Course Content Outline	CO	Teaching & Learning Activities						Total SLT
		Guided Learning (F2F)*				Guided Learning (NF2F)*	Independent Learning (NF2F)*	
		L	T	P	O			
Topic 1: Introduction To Artificial Intelligence (AI) What is AI? Definition and comparison of Artificial Intelligence, Machine Learning, and Deep Learning 4 categories of AI – rational logic vs human-like The History of AI AI in the Industry Practical Tools for AI	1,4	6	0	3	0	0	9	18
Topic 2: Supervised Learning Comparison between supervised and unsupervised learning K Nearest Neighbours algorithm Handling training data for appropriate fitting Regularization Gradient Descent Types of regression Measuring error	1,3	9	0	0	0	0	9	18
Topic 3: Problem-Solving Concept Problem Solving in Artificial Intelligence Search Strategies Genetic algorithms	1,2,4	6	0	3	0	0	9	18
Topic 4: Neural Networks Artificial neurons Backpropagation Training neural networks Regularization	1,3,4	6	0	3	0	0	9	18
Topic 5: Unsupervised Learning Comparison between unsupervised and supervised learning Introduction to clustering Dimensionality reduction	1,3	3	0	0	0	0	3	6
Topic 6: Data Science Primer Importance and scale of data Data collection Data enhancement Enterprise applications of data science	1,2,3	3	0	0	0	0	3	6
Total Notational Hours		33	0	9	0	0	42	84
Continuous Assessment		Percentage (%)		F2F		NF2F		TotalSLT
Test / Assignment / Practical		40%		3		21		24

	Final Assessment	Percentage (%)	F2F	NF2F	Total SLT
	Final Examination	60%	2	10	12
	GRAND TOTAL SLT				120
	* L = Lecture, T = Tutorial, P = Practical, O = Others * F2F = Face-to-Face, NF2F = Non Face-to-Face				
12.	Special Requirement or Resources to Deliver the Course (e.g., software, nursery, computer laboratory, simulation room) Python Anaconda Distribution, Computer Lab				
13.	Main References: 1. Russel, S. J., & Novig, P., 2010. <i>Artificial intelligence: A modern approach</i> . (3rd ed.). Upper Saddle River, N. J.: Prentice Hall. Additional References: 1. F., 2008. <i>Artificial intelligence: Structures and strategies for complex problem solving</i> . (6th ed.). Harlow, England: Addison-Wesley. 3. Prateek, J. (2016) Python : Real World Machine Learning : Take your Python Machine learning skills to the next level. Packt Publishing				
14.	Other Additional Information: NIL				
15.	Date of Senate Approval: 9 May 2019				
16.	Effective Trimester: May 2019				

Information on Practical			
Lab	Activity		Contact Hours
1	Topic: Introduction to Python programming for artificial intelligence Task: Learn to setup and use a Jupyter notebook for visualizing data from provided datasets. Based on the provided notebook, analyze and draw conclusions from one of the provided datasets. Resources: Python Anaconda Distribution		3
2	Topic: Finding the best solution using Genetic Algorithms Task: Solve the Travelling Salesman Problem using GA, based on provided datasets. Resources: Python Anaconda Distribution		3
3	Topic: Learning patterns using Neural Networks Task: Train and compare performance between a random forest and various neural network architectures on a medical dataset. Resources: Python Anaconda Distribution		3
